The simplest way to invest in the Philippine Stock Market

Easy to understand. Convenient to trade. Instant diversification.

The advantages of index-tracking mutual funds and stocks seamlessly combined in one unique investment product.

OUR SIMPLE SOLUTION

First Metro Philippine Equity Exchange-Traded Fund (FMETF) is the first and only exchange-traded fund (ETF) in the country.

It tracks the performance of the Philippine Stock Exchange Index (PSEi) by investing in the 30 blue-chip companies that make up the PSEi.

The FMETF trades like a stock on the Philippine Stock Exchange, and can be bought or sold online during trading hours with just a few strokes on your mobile device.

It is managed by First Metro Asset Management, Inc. (FAMI), a subsidiary of First Metro Investment Corporation of the Metrobank Group.

AT FIRST METRO SECURITIES, WE CAN SHOW YOU HOW EASY IT IS TO BUILD YOUR WEALTH WITH THE FMETF.

DIVERSIFY AND REDUCE RISK EFFICIENTLY

The FMETF allows you to invest, in a single trade, in a basket of stocks of large well-established companies that are recognized leaders in their respective industries.

EASY TO TRADE

Like a regular listed stock, you can trade the FMETF anytime, anywhere using an online trading platform like FirstMetroSec. There's no minimum holding period.

RELIABLE PERFORMANCE

The FMETF offers no surprises in the type of companies it holds and its performance. It matches the returns of the PSEi and holds exactly the same set of securities.

A BUILDING BLOCK FOR SOPHISTICATED STRATEGIES

The FMETF can be used in many ways – either on its own or in combination with other investments as part of more sophisticated strategies. The FMETF is perfect for Peso-Cost Averaging, Core-Satellite, and Cash Equitization strategies.
